DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4, 8-10 and 13-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Lowery (5402518).

Lowery discloses a mouse device (col. 2, lines 46-54; col. 14, lines 48-53) comprising an audio wheel (col. 14, lines 7-15) for controlling a volume of an audio output. The audio wheel capable of being moved forward and backward to increase or decrease a volume of the audio output inherently.

3. Claims 1 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by the muse with ears article.

The article discloses a mouse device comprising control devices for controlling a mute and volume of an audio output.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2675

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 5 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over the mouse with ears in view of Nakazato et al. (JP409162768).

The article does not disclose toggling a mute in response to a control device being depressed twice

Nakazato discloses using a single control device (a switch) for generating a multiple functions in response to the numbers of time the control device being pressed. Nakazato further discloses generating a mute function in response to the control device being depressed twice.

It would have been obvious to one ordinary skill in the art to use Nakazato's single control device for controlling a mute and volume of the audio output. in the invention of the article because of the same purpose as Nakazato uses in his invention, which is using the single control device for generating a multiple functions.

Allowable Subject Matter

6. Claims 6-7, 11 and 16-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. Claim 18 is allowed.

Art Unit: 2675
